Interactive Cares DevOps Career Path Assignment-2

Md Shefat Al Mahmud

Topic: Deploy a static webpage using GitHub pages.

Overview:

This document is about the procedure of assignment 2 of DevOps Career Path Course. Here I attached my GitHub Repository link and the deployed site link.

GitHub Repository Link:

https://github.com/shefat2002/Sample_Website/

Deployed Site Link:

https://shefat2002.github.io/Sample_Website/

Steps:

- ➢ **Created a GitHub Repository named "Sample_Website".**
- ➢ **Cloned the repository to local using git.**
- ➢ **Created the main branch along with README.md file.**
- ➢ **Created other branches, HTML, CSS, JS, SCSS, images, text, Webfonts.**
- ➢ **Added .html, .text files into HTML and text branches respectively and commited and pushed to GitHub.**
- ➢ **Added css, js, sass, webfont, images folders into CSS, JS, SCSS, Webfonts, images branches respectively and commited and pushed to GitHub.**
- ➢ **Took screenshot of each branch commit history. (attached)**
- ➢ **After completing the above tasks, merged all branches other than main to main branch.**
- ➢ **Deployed the main branch using GitHub pages.**
- ➢ **Deleted the all branches expect main.**
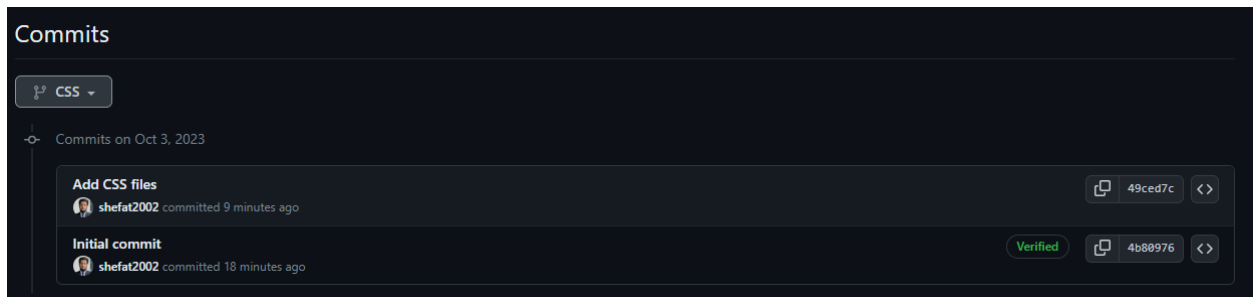

Summary:

Doing the above steps, I've completed the Assignment 2.

Screenshots:
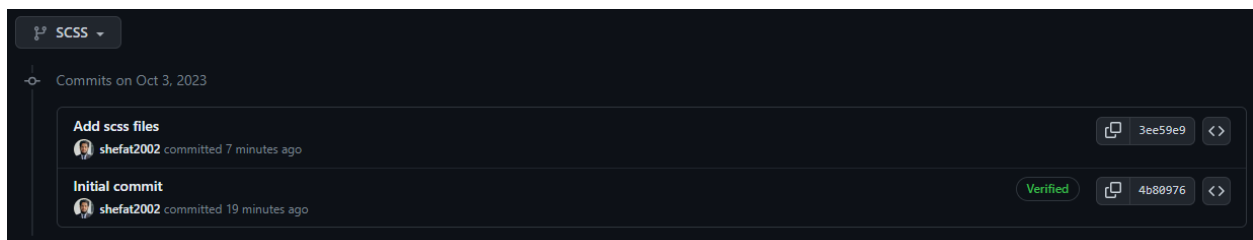

➢ Screenshot of **HTML** branch commit history.
